

7310 4-D REACH-FORK® TRUCK

FOUR-DIRECTIONAL MANEUVERABILITY AND VERSATILITY

Efficient use of storage space and increased productivity are critical with increasing demands on warehouse operations today. For reach truck users who have to handle long loads, the Raymond 7310 4-D® Reach-Fork truck **increases storage space up to 40% more** and aids operators with less damage to your inventory, rack and equipment.

- + **Four-directional travel capability** / eliminates the need for right angle turns and allows sideways travel down narrower aisles.
- + **Designed with our exclusive ACR System™** / operators experience quicker acceleration and electronic braking, faster lift and lower speeds and smoother directional changes.
- + **Patented open view mast and highly intuitive simultaneous function control handle** / allows operators to place, pick and move big loads more precisely and in less time.
